The Double José Saramago 2005-10-03 A “wonderfully twisted meditation on identity and individuality” from a Nobel Prize–winning author who pushes fiction to its very limits (*The Boston Globe*). As this novel by the author of *Blindness* and *All the Names* begins, Tertuliano Máximo Afonso is a divorced, depressed history teacher. To lift his spirits, a colleague suggests he rent a certain video. Tertuliano watches the film, unimpressed. But during the night, when he is awakened by noise, he finds the VCR replaying the video and watches in astonishment as a man who looks exactly like him—or, more specifically, exactly like he did five years earlier, mustachioed and fuller in the face—appears on the screen. Against his own better judgment, Tertuliano decides to pursue his double. As he roots out the man’s identity, what begins as a whimsical chase becomes a probing investigation into what makes us human. Can we be reduced to our outward appearance, rather than the sum of our experiences? The inspiration for the film *Enemy* starring Jake Gyllenhaal and directed by Denis Villeneuve, *The Double* is a timeless novel from a writer John Updike described in *The New Yorker* as “like Faulkner, so confident of his

resources and ultimate destination that he can bring any impossibility to life by hurling words at it.” “It’s tempting to think of [The Double] as his masterpiece.” —The New York Times Translated from the Portuguese by Margaret Jull Costa

Second Suns David Oliver Relin 2016-09-20 The extraordinary chronicle of two doctors “bringing light to those in darkness” (Time)—the “miracle workers” whose story is featured on 60 Minutes The publisher will donate a portion of its proceeds on the sale of this book to the Himalayan Cataract Project. Second Suns is the unforgettable true story of two very different doctors with a common mission: to rid the world of preventable blindness. Dr. Geoffrey Tabin was the high-achieving “bad boy” of his class at Harvard Medical School. Dr. Sanduk Ruit grew up in a remote village in the Himalayas, where cataract blindness—easily curable in modern hospitals—amounts to an epidemic. Together, they pioneered a new surgical method, by which they have helped restore sight to over 4 million people—all for about \$20 per operation. #1 New York Times—bestselling author David Oliver Relin brings the doctors’ work to vivid life through poignant portraits of their patients, from old men who can once again walk treacherous mountain trails, to children who can finally see their mothers’ faces. The Himalayan Cataract Project is changing the world—one pair of eyes at a time.

Raweyat Al Aflam (The Movie-maker Arabic Ed) Hernán Rivera Letelier 2012-05-08 Maria Margarita is a young girl from a small Chilean village who is famous for her strange gift of recreating the stories of movies. When a new film comes to town - whether the latest Marilyn Monroe or Gary Cooper or a Mexican musical - the villagers pay her to watch the movie so that she can tell them all about it on her return. Tender, magical and moving, Hernan Rivera Letelier tells the nostalgic tale of South American village cinemas in their full glory.

Rich Dad, Poor Dad Robert T. Kiyosaki 2016-04-27 Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions.

Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

Teaching and Learning for the Twenty-First Century Fernando M. Reimers 2019-01-02 This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty-first-century, and how those nations have fashioned educational policies and curricula meant to promote those skills. The book examines six countries—Chile, China, India, Mexico, Singapore, and the United States—exploring how each one defines, supports, and cultivates those competencies that students will need in order to succeed in the current century. Teaching and Learning for the Twenty-First Century appears at a time of heightened attention to comparative studies of national education systems, and to international student assessments such as those that have come out of PISA (the Program for International Student Assessment), led by the Organisation for Economic Co-operation and Development. This book's crucial contribution to the burgeoning field of international education arises out of its special attention to first principles—and thus to first questions: As Reimers and Chung explain, "much can be gained by an explicit investigation of the intended purposes of education, in what they attempt to teach students, and in the related questions of why those purposes and how they are achieved." These questions are crucial to education practice and reform at a time when educators (and the students they serve) face unique, pressing challenges. The book's detailed attention to such questions signals its indispensable

value for policy makers, scholars, and education leaders today.

Frankenstein (Modern English Translation) Mary Shelley 2019-05 Carefully edited for modern readers to allow for easier reading Obsessed with the secret of creation, Swiss scientist Dr. Victor Frankenstein cobbles together a body he's determined to bring to life. And one fateful night, he does. When the creature opens his eyes, the doctor is repulsed: his vision of perfection is, in fact, a hideous monster. Dr. Frankenstein abandons his creation, but the monster won't be ignored, setting in motion a chain of violence and terror that shadows Victor to his death. Mary Shelley's *Frankenstein*, a gripping story about the ethics of creation and the consequences of trauma, is one of the most influential Gothic novels in British literature. It is as relevant today as it is haunting.

A History of Reading in the West Guglielmo Cavallo 2003 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

The Theory of Communicative Action Jürgen Habermas 2015-10-07 This study offers a systematic reconstruction of the theoretical foundations and framework of critical social theory. It is Habermas' "magnum opus", and it is regarded as one of the most important works of modern social thought. In this second and final volume of the work, Habermas examines the relations between action concepts and systems theory and elaborates a framework for analyzing the developmental tendencies of modern societies. He discusses in detail the work of Marx, Durkheim, G.H. Mead and Talcott Parsons, among others. By distinguishing between social systems and what he calls the "life-world", Habermas is able to analyze the ways in which the development of social systems impinges upon the symbolic and subjective dimensions of social life, resulting in the kind of crises, conflicts and protest movements which are characteristic of advanced capitalist societies in the late-20th century.

Notes on the Death of Culture Mario Vargas Llosa 2015-07-14 In the past, culture was a kind of vital consciousness that constantly rejuvenated and

revivified everyday reality. Now it is largely a mechanism of distraction and entertainment. Notes on the Death of Culture is an examination and indictment of this transformation - penned by none other than the Nobel winner Mario Vargas Llosa, who is not only one of our finest novelists but one of the keenest social critics at work today. Taking his cues from T. S. Eliot - whose treatise Notes Towards the Definition of Culture is a touchstone precisely because the culture Eliot aimed to describe has since vanished - Vargas Llosa traces a decline whose ill effects have only just begun to be felt. He mourns, in particular, the figure of the intellectual: for most of the twentieth century, men and women of letters drove political, aesthetic, and moral conversations; today they have all but disappeared from public debate. But Vargas Llosa stubbornly refuses to fade into the background. He is not content to merely sign a petition; he will not bite his tongue. A necessary provocateur, here vividly translated by John King, provides an impassioned and essential critique of our time and culture. The Chosen Species Juan Luis Arsuaga 2006 Is modern man the logical conclusion of a long evolutionary journey? Or are humans merely an evolutionary accident? The Chosen Species answers these and many other questions about our origins. Authors Juan Luis Arsuaga and Ignacio Martínez are world-renowned paleoanthropologists and co-directors of the

excavations at Atapuerca---a World Heritage Site and Europe's oldest known burial site---where their team discovered a new human species, homo antecessor. Their work has changed the way we see human evolution. Here, the authors draw on their rich experience to provide a fascinating account of our origins. They reconstruct the sequence of events, give an account of how, when, and why man evolved, and draw conclusions based on verifiable facts and well-founded argument. The Chosen Species combines scientific rigor with a spellbinding style that will grip readers as they follow the tale to its end.

OECD Skills Strategy 2019 2019 The OECD Skills Strategy provides a strategic and comprehensive approach for ensuring that people and countries have the skills to thrive in a complex, interconnected and rapidly changing world. The updated 2019 OECD Skills Strategy takes account of the lessons learned from applying the original skills strategy in 11 countries since 2012, while also incorporating new OECD evidence about the skills implications of megatrends, such as globalisation, digitalisation, population ageing, and migration. The Strategy also incorporates new learning from across the OECD about skills policies that work in these three broad components: developing relevant skills over the life course, using skills effectively in work and society, and strengthening the governance of skills systems.
