Reproductive Health and Research 2003 This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. Josie's Story Sorrel King 2010-09-14 The "wrenching but inspiring" true story of a tragic medical mistake that turned a grieving mother into a national advocate (The Wall Street Journal). Sorrel King was a young mother of four when her eighteen-month-old daughter was badly burned by a faulty water heater in the family's new home. Taken to the world-renowned Johns Hopkins Hospital, Josie made a remarkable recovery. But as she was preparing to leave, the hospital's system of communication broke down and Josie was given a fatal shot of methadone, sending her into cardiac arrest. Within forty-eight hours, the King family went from planning a homecoming to planning a funeral. Dizzy with grief, falling into deep depression, and close to ending her marriage, Sorrel slowly pulled herself and her life back together. Accepting Hopkins' settlement, she and her husband established the Josie King Foundation. They began to implement basic programs in hospitals emphasizing communication between patients, family, and medical staff—programs like Family-Activated Rapid Response Teams, which are now in place in hospitals around the country. Today Sorrel and the work of the foundation have had a tremendous impact on health-care providers, making medical care safer for all of us, and earning Sorrel a well-deserved reputation as one of the leading voices in patient safety. "I cried . . . I cheered" at this account of one woman's unlikely path from full-time mom to nationally renowned patient advocate (Ann Hood). "Part indictment, part celebration, part catharsis" Josie's Story is the startling, moving, and inspirational chronicle of how a mother—and her unforgettable daughter—are transforming the face of American medicine (Richmond Times-Dispatch).

Our students are the future leaders, parents, workers and citizens of our society. While tests and accountability are very important; the outcome is far greater than basing achievement on individual performance on tests. Information included in More Than a Test Score, derives from educators who empower students to take ownership in their educational journey by using a variety of strategies and programs to meet the needs of the students. The strategies target academic, behavioral and social components in education. Building relationships is one of the main keys to success in school and every endeavor faced by the youth of our society. Success stories are included to show how caring has made a difference with all those involved.
