The Origins of Writing Wayne M. Senner 1991-01-01 This collection of 12 essays outlines what is now known about the origins and development of writing. The topics discussed include such precursors to writing as the tokens used for record-keeping in the Middle East, as well as cuneiform and Egyptian hieroglyphics. The alphabet is treated from its invention to its use in Arabic, Greek and Latin. Also presented are the writing systems of China and Middle America and two European systems, runes and ogham, that have been superseded by the Latin alphabet. An introduction surveys the subject and explores myths and theories on the invention of writing.

Introduction to Biblical Hebrew Thomas Oden Lambdin 1973 This book is designed to cover one year's work in Hebrew leading up to a full understanding of the language. It has been used by the author with his students for many years and the published text is the result of testing and refining over these years. Every attempt has been made to make the grammar clear and simple. For example, all Hebrew words are transliterated, as well as being given in the original for the first three-quarters of the book. The grammatical discussion is made as unsophisticated as possible for it is the author's intention that this book should also be of use to those who study Hebrew without a teacher.

The Medieval Salento Linda Safran 2014-03-21 Located in the heel of the Italian boot, the Salento region was home to a diverse population between the ninth and fifteenth centuries. Inhabitants spoke Latin, Greek, and various vernaculars, and their houses of worship served sizable congregations of Jews as well as Roman-rite and Orthodox Christians. Yet the Salentines of this period laid claim to a definable local identity that transcended linguistic and religious boundaries. The evidence of their collective culture is embedded in the traces they left behind: wall paintings and inscriptions, graffiti, carved --tombstone decorations, belt fittings from graves, and other artifacts reveal a wide range of religious, civic, and domestic practices that helped inhabitants construct and maintain personal, group, and regional identities. The Medieval Salento allows the reader to explore the visual and material culture of a people using a database of over three hundred texts and images, indexed by site. Linda Safran draws from art history, archaeology, anthropology, and ethnohistory to reconstruct medieval Salentine customs of naming, language, appearance, and status. She pays particular attention to Jewish and nonelite residents, whose lives in southern Italy have historically received little scholarly attention. This extraordinarily detailed visual analysis reveals how ethnic and religious identities can remain distinct even as they mingle to become a regional culture.

Stanislaw Brzozowski and the Migration of Ideas Jens Herlth 2019-02-28 As a writer, critic, and philosopher, Stanislaw Brzozowski (1878-1911) left a lasting imprint on Polish culture. He absorbed

virtually all topical intellectual trends of his time, adapting them for the needs of what he saw as his primary mission: the modernization of Polish culture. The essays of the volume reassess and contextualize Brzozowski's writings from a distinctly transnational vantage point. They shed light on often surprising and hitherto underrated affinities between Brzozowski and intellectual figures and movements in Eastern and Western Europe. Furthermore, they explore the presence of his ideas in twentieth-century century literary criticism and theory.

The New Evidence that Demands a Verdict Josh McDowell 1999 Among important books in the defense of Christianity, this one has few equals. Evidence That Demands a Verdict is an easy-to-read, front-line defense for Christians facing the tough questions of critics and skeptics. Using secular evidences and other historical sources, Josh McDowell's faith-building book is a must read for every Christian.

Raising Vegetarian Children Joanne Stepaniak 2002-10-16 This handbook aims to debunk the myth that vegetarian diets provide inadequate nutrition for growing children. Separate chapters address the needs of infants, preschoolers, school-age children, and teenagers. There are lots of child-friendly recipes, and a resources section.

The Pseudoscience Wars Michael D. Gordin 2012-09-17 Properly analyzed, the collective mythological and religious writings of humanity reveal that around 1500 BC, a comet swept perilously close to Earth, triggering widespread natural disasters and threatening the destruction of all life before settling into solar orbit as Venus, our nearest planetary neighbor. Sound implausible? Well, from 1950 until the late 1970s, a huge number of people begged to differ, as they devoured Immanuel Velikovsky's major best-seller, *Worlds in Collision*, insisting that perhaps this polymathic thinker held the key to a new science and a new history. Scientists, on the other hand, assaulted Velikovsky's book, his followers, and his press mercilessly from the get-go. In *The Pseudoscience Wars*, Michael D. Gordin resurrects the largely forgotten figure of Velikovsky and uses his strange career and surprisingly influential writings to explore the changing definitions of the line that separates legitimate scientific inquiry from what is deemed bunk, and to show how vital this question remains to us today. Drawing on a wealth of previously unpublished material from Velikovsky's personal archives, Gordin presents a behind-the-scenes history of the writer's career, from his initial burst of success through his growing influence on the counterculture, heated public battles with such luminaries as Carl Sagan, and eventual eclipse. Along the way, he offers fascinating glimpses into the histories and effects of other fringe doctrines, including creationism, Lysenkoism, parapsychology, and more—all of which have surprising connections to Velikovsky's theories. Science today is hardly universally secure, and scientists seem themselves beset by critics, denialists, and those they label "pseudoscientists"—as seen all too clearly in battles over evolution and climate change. The Pseudoscience Wars simultaneously reveals the surprising Cold War roots of our contemporary dilemma and points readers to a different approach to drawing the line between knowledge and nonsense.

American Catholic Arts and Fictions Paul Giles 1992-06-26 Examines how secular transformations of religious ideas have helped to shape the style and substance of works by American writers, filmmakers and artists from Catholic backgrounds.

Alfred Jarry Alastair Brotchie 2015-08-21 This long-awaited biography of Alfred Jarry reconstructs a life both "ubuesque" and pataphysical. When Alfred Jarry died in 1907 at the age of thirty-four, he was a legendary figure in Paris—but this had more to do with his bohemian lifestyle and scandalous behavior than his literary achievements. A century later, Jarry is firmly established as one of the leading figures of the artistic avant-garde. Even so, most people today tend to think of Alfred Jarry only as the author of the play *Ubu Roi*, and of his life as a string of outlandish "ubuesque" anecdotes, often recounted with wild inaccuracy. In this first full-length critical biography of Jarry in English, Alastair Brotchie reconstructs the life of a man intent on inventing (and destroying) himself, not to mention his world, and the "philosophy" that defined their relation. Brotchie alternates chapters of biographical narrative with chapters that connect themes, obsessions, and undercurrents that relate to the life. The anecdotes remain, and are even augmented: Jarry's assumption of the "ubuesque," his inversions of everyday behavior (such as eating backward, from cheese to soup), his exploits with gun and bicycle, and his herculean feats of drinking. But Brotchie distinguishes between Jarry's purposely playing the fool and deeper nonconformities that appear essential to his writing and his thought, both of which remain a vital

subterranean influence to this day.

Robert Altman's *Subliminal Reality* Robert T. Self 2002 With his complex and unconventional films, Robert Altman often draws an impassioned response from critics but bafflement and indifference from the general public. Some audiences have dismissed his movies as insignificant, unsatisfying, and unreadable. Ironically, Altman might agree: he makes films in order to challenge filmgoers' expectations of straightforward narratives and easily understood endings. In Robert Altman's *Subliminal Reality*, Robert T. Self sheds light on Altman's work and provides the most comprehensive analysis of his films to date. With close readings of classics like *MASH*, *McCabe & Mrs. Miller*, and *Nashville*, as well as the more recent films *The Player*, *Short Cuts*, and *Cookie's Fortune*, Self asserts the value of Altman's work not only to film theory and the entertainment industry but to American culture. World Philology Sheldon Pollock 2015-01-05 Philology—the discipline of making sense of texts—is enjoying a renaissance within academia. World Philology charts the evolution of philology across the many cultures and time periods in which it has been practiced and demonstrates how this branch of knowledge, like philosophy and mathematics, is essential to human understanding.

Peer Groups and Children's Development Christine Howe 2009-12-10 Peer Groups and Children's Development considers the experiences of school-aged children with their peer groups and its implications for their social, personal and intellectual development Focuses on the peer group experiences of children attending school in Western societies, from five years of age through to adolescence Considers peer groups in classrooms, friendships made within and outside of school, and the groups that children participate in for extra-curricular activities Includes a final summary which brings together the significant implications for theory, policy and practice Unique in that no other volume reviews and integrates literature relating to peer groups in both classroom and out-of-class settings Addresses the research interests of psychologists and educationalists, as well as the practical concerns of teachers, parents, counsellors, and policy makers

Imagining Language Jed Rasula 2001 When works such as Joyce's *Finnegans Wake* and Stein's *Tender Buttons* were first introduced, they went so far beyond prevailing linguistic standards that they were widely considered "unreadable," if not scandalous. Jed Rasula and Steve McCaffery take these and other examples of twentieth-century avant-garde writing as the starting point for a collection of writings that demonstrates a continuum of creative conjecture on language from antiquity to the present. The anthology, which spans three millennia, generally bypasses chronology in order to illuminate unexpected congruities between seemingly discordant materials. Together, the writings celebrate the scope and prodigality of linguistic speculation in the West going back to the pre-Socratics.

Epigraphic Evidence John Bodel 2012-11-12 Epigraphic Evidence is an accessible guide to the responsible use of Greek and Latin inscriptions as sources for ancient history. It introduces the types of historical information supplied by inscriptional texts and the methods with which they can be used. It outlines the limitations as well as the advantages of the different types of evidence covered. Epigraphic Evidence includes a general introduction, a guide to the arrangement of the standard corpora inscriptions and individual chapters on local languages and native cultures, epitaphs and the ancient economy amongst others.

Belief in Media Mary E. Hess 2020-07-25 Most works on media developments and Christianity approach the subject from the perspective of the implications of new media technologies for traditional Christian practices or how churches can use new media to further their goals. The common framework of analysis is a 'given reality' of traditional institutional Christianity and how it interacts with, affects and is affected by media. Media are treated as a separate cultural reality. This book presents, in an accessible form, the new directions that approach the interaction of media and religion from a cultural perspective, and illustrates these new directions by a number of international and intercultural case studies and explorations. Looking at how global media are constructing cultural forms, structures and processes, the authors show how these have become the life out of which individual and social meaning is created and practised. Examining how individuals create religious meaning by interacting with media of various kinds, crossing boundaries of traditional religious cultures and contemporary media cultures, this book reveals how Christian institutions are also defined in the process of living culturally within their broader media context.

COVID-19 in the Global South Carmody, Pádraig 2020-10-21 Available Open Access under CC-BY-NC-ND licence. Bringing together a range of experts across various sectors, this important volume explores some of the key issues that have arisen in the Global South with the COVID-19 pandemic. Situating the worldwide health crisis within broader processes of globalisation, the book investigates implications for

development and gender, as well as the effects on migration, climate change and economic inequality. Contributors consider how widespread and long-lasting responses to the pandemic should be, while paying particular attention to the accentuated risks faced by vulnerable populations. Providing answers that will be essential to development practitioners and policy makers, the book offers vital insights into how the impact of COVID-19 can be mitigated in some of the most challenging socio-economic contexts worldwide.

Scientific Babel Michael D. Gordin 2015-04-13 English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With Scientific Babel, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and Scientific Babel reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Topics include: philosophy of language, psycholinguistics, historical linguistics, history of (Hungarian) linguistics, phonology, syntax, typology.

International Planned Languages Detlev Blanke 2019-01-05 The author of this book, the German interlinguist and Esperanto researcher Detlev Blanke (1941-2016), has influenced the study of planned languages like no one else. It is to a large extent due to his lifelong scholarly devotion to this area of research that Interlinguistics and Esperanto Studies (Esperantology) have become serious subjects of study in the academic world. In his publications, Blanke gives an overview of the history of language creation. He describes the most important planned language systems and presents various systems of classification. A special focus is put on Esperanto initiated by L.L. Zamenhof in 1887. (Sabine Fiedler) For Blanke, a planned language was essentially a tool: if it worked it was worthy of study and use; if it failed to work, he was interested in why, though at the same time careful to avoid value judgments. Blanke himself spoke a planned language, namely Esperanto, and recognised this language and language projects like it as arising out of a coherent theoretical base and addressing a recognisable problem. Essentially independently of the sociolinguistic school in the west, Blanke had reached a similar conclusion: if a language phenomenon exists, it is worthy of scholarly examination in itself. Blanke was particularly interested in how planned languages related to ethnic languages, how the 'artificiality' of, say, Esperanto extended to, indeed was synonymous with, the 'artfulness' of ethnic language, and how planned language could solve taxonomic and terminological problems. (Humphrey Tonkin)

Martyrology Books 3 & 4 bp Nichol 1994-01-18 'All of Nichol's work is stamped by his desire to create texts that are engaging in themselves as well as in context, and to use indirect structural and textual devices to carry meaning. In The Martyrology different ways of speaking testify to a journey through different ways of being. Language is both the poet's instructor and, through its various permutations, the dominant 'image' of the poem. The [nine] books of The Martyrology document a poet's quest for insight into himself and his writing through scrupulous attention to the messages hidden in the morphology of his own speech.' – Frank Davey

Exploits & Opinions of Doctor Faustroll, Pataphysician Alfred Jarry 1996 The singular novel by the legendary author of the play, UBU ROI, is a book that can only be compared to Rabelais or Sterne. FAUSTROLL recounts the adventures of the inventor of PATAPHYSIC, the 'science of imaginary solutions.' Jarry would have found an audience more readily if he had simply written a work of science fiction, a symbolist narrative, a bawdy tale or a spiritual allegory. As it is, FAUSTROLL is all of these at the same time.' - Roger Shattuk'

Blizzards Michael Woods 2007-09-01 A winter snowfall can be beautiful. But if conditions call for dense snow, freezing temperatures, and bone-chilling wind, you are in for a dangerous blizzard. These blinding, swirling storms can shut down roads and damage buildings. Violent winds can thrash vehicles driving on icy roads. Snowdrifts can pile up to block streets or even cover houses. Blizzards can knock out power and threaten the lives of people stranded inside for days or worse, those caught outside in the storm. With dramatic images and first-hand survivor stories plus the latest facts and figures this book shows you blizzard disasters up close.

Later Travels Ciriaco 2003 Cyriac of Ancona is sometimes regarded as the father of classical archaeology. Cyriac's accounts of his travels, with commentary reflecting wide-ranging antiquarian, political, religious, and commercial interests, provide a fascinating record of the encounter of the Renaissance world with the legacy of classical antiquity.

Operations Management Nigel Slack 2019-04-22 Operations management is important, exciting, challenging ... and everywhere you look! Important, because it enables organisations to provide services and products that we all need Exciting, because it is central to constant changes in customer preference, networks of supply and demand, and developments in technology Challenging, because solutions must be financially sound, resource-efficient, as well as environmentally and socially responsible And everywhere, because in our daily lives, whether at work or at home, we all experience and manage processes and operations. Media Activism in the Digital Age Victor Pickard 2017-07-06 The growing subfield of media activism studies has gained wide attention in recent years, but little consensus exists regarding its central questions and concerns. This book begins to chart an evolving research agenda by providing a cross-section of provocative work in this area. Victor Pickard and Guobin Yang have assembled essays by leading scholars and activists to provide case studies of feminist, technological, and political interventions during different historical periods and at local, national, and global levels. Looking at the underlying theories, histories, politics, ideologies, tactics, strategies and aesthetics, the book takes an expansive view of media activism. It explores how varieties of activism are mediated through communication technologies, how activists deploy strategies for changing the structures of media systems, and how governments and corporations seek to police media activism. From memes to zines, hacktivism to activism, this volume considers activist practices involving both older kinds of media and newer digital, social, and network-based forms. The book captures an exciting moment in the evolution of media activism studies and offers an invaluable guide to a vibrant and evolving field of research.

Introducción a la teología cristiana / Introduction To Christian Theology Justo L. Gonzalez 2003 Una clara, concisa y atrayente introducción a un campo que esta regresando una vez mas, especialmente entre los laicos comprometidos con el renovado interés en el crecimiento espiritual dentro del contexto de una tradición eclesial. Como historiadores del cristianismo, los autores de este libro ofrecen una introducción a las doctrinas cristianas tradicionales. Escrito en un estilo claro directo, este libro presenta una reseña de las raíces, los contextos particulares, y los entendimientos doctrinales de temas como la teología, Dios, el ser humano, Jesucristo, la iglesia, y la esperanza.

Good Data Angela Daly 2019-01-23 Moving away from the strong body of critique of pervasive ?bad data? practices by both governments and private actors in the globalized digital economy, this book aims to paint an alternative, more optimistic but still pragmatic picture of the datafied future. The authors examine and propose ?good data? practices, values and principles from an interdisciplinary, international perspective. From ideas of data sovereignty and justice, to manifestos for change and calls for activism, this collection opens a multifaceted conversation on the kinds of futures we want to see, and presents concrete steps on how we can start realizing good data in practice.
