Critical Path R. Buckminster Fuller 1982-02-15 The masterwork of a brilliant career, and an important document of the crisis now facing mankind. Today we find ourselves in the midst of the greatest crisis in the history of the human race. Technology has placed in our hands almost unlimited power at the very moment when we have run up against the limits of our resources aboard Spaceship Earth, as the crises of the late twentieth century—political, economic, environmental, and ethical—determine whether or not humanity survives. In this masterful summing up of an entire lifetime's thought and concern, R. Buckminster Fuller addresses these crucial issues in his most significant, accessible, and urgent work. Critical Path traces the origins and evolution of humanity's social, political, and economic systems from the obscure mists of prehistory, through the development of the great political empires, to the vast international corporate and political systems that control our destiny today to show how we got to our present situation and what options are available to man. With his customary brilliance, extraordinary energy, and unlimited devotion, Bucky Fuller shows how mankind can survive, and how each individual can respond to the unprecedented threat we face today. The crowning achievement of an extraordinary career, Critical Path offers the reader the excitement of understanding the essential dilemmas of our time and how responsible citizens can rise to meet this ultimate challenge to our future.

Nonstop Metropolis Rebecca Solnit 2016-10-19 "Nonstop Metropolis, the culminating volume in a trilogy of atlases, conveys innumerable unbound experiences of New York City through twenty-six imaginative maps and informative essays. Bringing together the insights of dozens of experts—from linguists to music historians, ethnographers, urbanists, and environmental journalists—amplified by cartographers, artists, and photographers, it explores all five boroughs of New York City and parts of nearby New Jersey. We are invited to travel through Manhattan's playgrounds, from polyglot Queens to many-faceted Brooklyn, and from the resilient Bronx to the mystical kung fu hip-hop mecca of Staten Island. The contributors to this exquisitely designed and gorgeously illustrated volume celebrate New York City's unique vitality, its incubation of the avant-garde, and its literary history, but they also critique its racial and economic inequality, environmental impact, and erasure of its past.

Nonstop Metropolis allows us to excavate New York's buried layers, to scrutinize its political heft, and to discover the unexpected in one of the most iconic cities in the world. It is both a challenge and homage to how New Yorkers think of their city, and how the world sees this capital of capitalism, culture, immigration, and more." -- Publisher's description.

Hav Jan Morris 2011-08-30 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Epic Iran John Curtis 2021-02-02 A stunning introduction to the material culture of some of the great civilizations of Asia Iran was the home of some of the greatest civilizations of both the ancient and medieval worlds, but these achievements remain poorly known and largely misunderstood outside the country. Epic Iran tells the story of Iran from pre-Islamic through modern times and provides an opportunity to see pieces from key museum and private collections. This book combines the ancient and Islamic periods and continues the narrative into the contemporary world. It shows how civilized life emerged in Iran around 3,200 BC and how a distinctive Iranian

identity formed 2,500 years ago has survived until today, expressed in the Persian language and in religious affiliations. Lavishly illustrated, some 250 images showcase pieces including goldwork, ceramics, glass, illustrated manuscripts, textiles, carpets, oil paintings, drawings, and photographs. Alongside the historical sweep are examples from contemporary artists and makers, demonstrating the rich antecedents still influencing some modern-day practitioners.

Nimrod and the Archaeology of the Tower of Babel Steven a Rudd 2019-05-16 Large format 8.5x11, full colour high glossy pages with over 60 custom high-resolution maps, graphics and photos. When you get the chronology right, the cartography right and the archaeology right, you will get the Bible text right. What you read in the book you find in the ground! This is the Bible story of the origin of civilization after the global Noahic flood. Christian Archaeological Dating (CAD) requires that no archaeology predates the flood. Scripture dates creation to 5554 BC and the Flood to 3298 BC using the Septuagint. Eight Bible markers in Genesis 10-11 decode the date of the Tower of Babel to around 2850 BC. Archaeology informs us that the Tower of Babel was a Temple to Enki, the freshwater god and was similar in design to the Stepped Pyramid of Djoser in Egypt. In Sumerian flood stories, Enki was the rebel god who warned "Noah" to build the ark over the wishes of the supreme god Enlil who had decreed the destruction of mankind. Ancient Jewish, Christian and secular literary sources unanimous record that Nimrod built the Tower of Babel. Josephus tells us that Nimrod built the Tower of Babel to survive a possible second global flood. Archaeological excavations at Eridu (Babel) demonstrate how over 350 years, Nimrod built 17 pagan mudbrick temples, one upon the other, all dedicated to Enki, the "savior of mankind". In Sumerian myths, Enki also caused the division of languages at Babel (Gen 11). During this earliest period of post-flood civilization, "rebel" Nimrod plays a key and central role in almost every area. The identity of Nimrod is unknown, but he is best represented by the character of Enmerkar in Sumerian literary sources. Although excavations at biblical Babel (Tel Eridu) in the 1940's did not find any evidence of the Tower itself, evidence of the 300-meter square elevated platform upon which the Tower of Babel was going to be built has been documented. The city of Eridu (Babel) and the platform were abandoned for 750 years until the Assyrian King Ur-Nammu built a Ziggurat Temple to Enki upon it in 2100 BC. Abraham leaves Ur the very year that Ur-Nammu begins construction of the Ziggurat in 2100 BC. To the Christian Nimrod is antitypical of Satan, Absalom and Judas as the epitome of rebellion, treason and betrayal against the One True God. The Tower of Babel represents false world religions

and false Christian doctrines.

An Encyclopaedia of Indian Archaeology Amalananda Ghosh 1990 "An Encyclopaedia of Indian Archaeology" is a significant reference work on archaeology in India. It is an authoritative work of permanent value in which the knowledge and expertise of Indian archaeologists from the Archaeological Survey of India, universities and other institutes have been pooled together under the editorship of the late A. Ghosh, former Director-General of the Archaeological Survey of India. The "Encyclopaedia" has been planned in an ambitious manner; it is not merely an alphabetical listing of entries with sketchy information on topics. Volume 1, which deals with certain broad subjects relating to Indian Archaeology, is divided into twenty chapters, alphabetically arranged. Each chapter is further divided into sections and subsections containing independent and self-contained essays. For example, in the chapter on "Cultures," detailed information can be found on various cultures in India; the chapter on "Basis of dating" contains articles on archaeological dating, archaeomagnetic dating, ¹⁴C radio-carbon dating, numismatic dating, palaeographic and epigraphic dating, thermoluminescent dating, etc. For those interested in getting further information on the subjects and in looking into the original sources and references, each entry also

carries an exhaustive bibliography. Volume II is the Gazetteer. It contains basic data and information on all the explored and excavated sites in India along with reference to published reports and/or notices on each.

The Twenty-First Century Performance Reader Teresa Brayshaw 2019-07-23 The Twenty-First Century Performance Reader combines extracts from over 70 international practitioners, companies, collectives and makers from the fields of Dance, Theatre, Music, Live and Performance Art, and Activism to form an essential sourcebook for students, researchers and practitioners. This is the follow-on text from The Twentieth-Century Performance Reader, which has been the key introductory text to all kinds of performance for over 20 years since it was first published in 1996. Contributions from new and emerging practitioners are placed alongside those of long-established individual artists and companies, representing the work of this century's leading practitioners through the voices of over 140 individuals. The contributors in this volume reflect the diverse and eclectic culture of practices that now make up the expanded field of performance, and their stories, reflections and working processes collectively offer a snapshot of contemporary artistic concerns. Many of the pieces have been specially commissioned for this edition and comprise a range of written forms – scholarly, academic, creative, interviews, diary entries, autobiographical, polemical and visual. Ideal for university students and

instructors, this volume's structure and global span invites readers to compare and cross-reference significant approaches outside of the constraints and simplifications of genre, encouraging cross-disciplinary understandings. For those who engage with new, live and innovative approaches to performance and the interplay of radical ideas, The Twenty-First Century Performance Reader is invaluable.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Search for Peace D. W. Bowett 2019-09-24 Using authoritative extracts from the relevant and important sources at the time, this volume, originally published in 1972, deals with the problems and difficulties of maintaining peace in the world. The control of the use of force remains the most intractable, and yet the most important, problem in international relations. Although the antagonists change, antagonism appears to be almost an inherent feature of inter-state relations and although global conflict has been avoided for the past quarter of a century, the risk is always present. The cost of such anarchy in international relations, measured in terms of human suffering and wastage of resources, is appalling. In this book, Dr Bowett looks at the need for peaceful settlement of international disputes, the peacekeeping role of the United Nations, aid to developing countries and disarmament, and suggests that the structure of international society based on the Sovereign State could be modified to lessen the risk of conflict. The extracts include statements by Khrushchev, Mao Tse-Tung, Che Guevara, Dag Hammarskjöld, U Thant, Ho Chi-Minh, and selections from many national and international documents.

Traditional Medicine Steven B. Kayne 2010 "The World Health Organization has acknowledged that the majority of people living in developing countries continue to use traditional medicine. Increased levels of immigration and migration also mean that health professionals are more likely to come into contact with patients using them. Traditional Medicine is therefore a vital and timely book which covers medical systems practised on five continents, including: traditional European folk medicine; Aboriginal/traditional medicine in North America; traditional medicine in the Colombian Amazon Tropical forest; traditional medical practice in Africa; traditional Chinese medicine; Indian Ayurvedic medicine; Japanese Kampo medicine; Korean medicine; traditional medicines in the Pacific; and traditional Jewish medicine."--Publisher's description.

Tourism, Religion and Pilgrimage in Jerusalem Kobi Cohen-Hattab 2014-08-07 Jerusalem is a city with a singular nature. Home to three religions, it contains spiritual meaning for people the world over; it is at once a tourist destination and a location with a complex political reality. Tourism, therefore, is an integral part of Jerusalem's development and its political conflicts. The book traces tourism and pilgrimage to Jerusalem from

the late Ottoman era, through the British Mandate, during the period of the divided city, and to the reunification of the city under Israeli rule. Throughout, the city's evolution is shown to be intertwined with its tourist industry, as tourist sites, accommodations, infrastructure, and services transform the city's structures and open spaces. At the same time, tourism is wielded by various parties in an effort to gain political recognition, to bolster territorial control, or to garner support. The city's future and the role tourism can play in it are examined. While the construction of a "security fence" will have many implications on Jerusalem's tourist industry, steps are proposed to minimize the effects of the security fence and optimize tourism. Written by leading academics, this title will be valuable reading for students, academics, and researchers in the fields of tourism, religious studies, geography, history, cultural studies, and anthropology.

The Gospel in the Stars Joseph Augustus Seiss 1882

A History of Sinai Lina Eckenstein 2015-11-06 SINAI is the peninsula, triangular in form, which projects into the Red Sea between Egypt and Arabia. The name used to be applied to the mountainous region of the south, now it is made to comprise the land as far north as the Mediterranean. Sinai is famous for the part which it has played in the religious history of mankind. It was at one time a centre of moon-cult, before it became the seat of the promulgation of the Law to the Jews at the time of Moses. In Christian times it was one of the chief homes of the hermits, and the possession of the relics of St. Katherine in the great convent of the south, caused Sinai to be included in the Long Pilgrimage throughout the Middle Ages. A history of Sinai deals with the people who visited the peninsula at different times, rather than with its permanent inhabitants, who, in the course of centuries, seem to have undergone little change. They still live the life of the huntsman and the herdsman as in the days of Ishmael, sleeping in the open, and adding to their meagre resources by carrying dates and charcoal to the nearest centres of intercourse, in return for which they receive corn. The country geographically belongs to Egypt, ethnologically to Arabia. It falls into three regions. In the north, following the coast line of the Mediterranean, lies a zone of drift sand, narrowest near Rafa on the borders of Palestine, widening as it is prolonged in a westerly direction towards Egypt, where it is conterminous with the present Suez Canal. This desert was known in Biblical days as Shur (the wall) of Egypt. And Saul smote the Amalekites from Havilah (north Arabia), until thou comest to Shur that is over against Egypt (1 Sam. xv. 7). The military highway from

Egypt to Syria from ancient times followed the coast line of the Mediterranean, the settlements along which were modified on one side by the encroachment of the sea, on the other by the invasion of sand. Adjoining this zone of drift sand, the land extends south with increased elevation to the centre of the peninsula, where it reaches a height of about 4000 ft., and abruptly breaks off in a series of lofty and inaccessible cliffs, the upper white limestone of which contrasts brilliantly in some places with the lower red sandstone. This region is, for the most part, waterless and bare. It is known in modern parlance as the Badiet T'h (the plain of wandering). Its notable heights include the Gebel el Ejneh and the Gebel Emreikah. This plain is drained in the direction of the Mediterranean by the great Wadi el Arish and its numerous feeders, which, like most rivers of Sinai, are mountain torrents, dry during the greater part of the year, and on occasion like the fiumare of Italy, flowing in a spate. The Wadi el Arish is the River of Egypt of the Bible (Gen. xv. 18; Num. xxxiv. 5), the Nahal Muzur of the annals of King Esarhaddon.
