hnc-pr-ed-2000.10 cehnc 1110-1-1 . engineering guidance . design manual. revision 8 . 31 december 2013 . prepared by . directorate of engineering . u.s. army engineering and support center, huntsville

High-Velocity Hurricane Zone - Roofing Package Broward County

General Limitations . Applicable Detail Drawings 3. Design calculations pe r Chapter 16, or if applicable, RAS 127 or RAS 128 . 4. Other Component Product Approval . 5. Municipal Permit Application . 6. Owner's Notification for Roofing Considerations (Reroofing Only) 7. Any Required Roof Testing / Calculation Documentation

Circular 1 Copyright Basics

"Works made for hire" are an important exception to the general rule for claiming copyright. When a work is made for hire, the author is not the individual who actually created the work. Instead, the party that hired the individual is considered the author and the copyright owner of the work. Whether a work is made for hire is determined by the facts that exist at the time the ...

Chapter 3: Design Loads for Residential Buildings - HUD User

Chapter 3 – Design Loads for Residential Buildings It should also be noted that the wind load factor of 1.5 in Table 3.1 used for load and resistant factor design is consistent with traditional wind design practice (ASD and LRFD) and has proven adequate in hurricane-prone environments when buildings are properly designed and constructed. The 1.5

BUILDING AIR INTAKE AND EXHAUST DESIGN - ASHRAE

Chapter 24 of the 2017 ASHRAE Handbook—Fundamentals de- ... In general, for a ti ght cluster to be considered as a single stack (i.e., to add stack momentums together) in dilution cal- culations, the stacks must be uncapped and nearly be touching the middle stack of the group. As shown in Figure 1, stack height h s is measured from the roof level on which the exhaust stack ...
