Learning objective at top of each exercise, so teachers can see gradual progression * Full coverage of UK curriculum objectives

Developing Number Knowledge Robert J Wright 2011-11-04 Following the great success of the earlier books, this fourth book in the Mathematics Recovery series equips teachers with detailed pedagogical knowledge and resources for teaching number to 7 to 11-year olds. Drawing on extensive programs of research, curriculum development, and teacher development, the book offers a coherent, up-to-date approach emphasising computational fluency and the progressive development of students' mathematical sophistication. The book is organized in key domains of number instruction, including structuring numbers 1 to 20, knowledge of number words and numerals, conceptual place value, mental computation, written computation methods, fractions, and early algebraic reasoning. Features include: " fine-grained progressions of instruction within each domain; " detailed descriptions of students' strategies and difficulties; " assessment tasks with notes on students' responses; " classroom-ready instructional activities; " an accompanying CD with extensive instructional resources. This book is designed for classroom and intervention teachers, special education teachers and classroom assistants. The book is an invaluable

resource for mathematics advisors and coaches, learning support staff, numeracy consultants, curriculum developers, teacher educators and researchers.

Tailored towards Key Stage 2, this Mental Maths activity book provides a fun way to test maths understanding and improve various maths skills.

Included in this book: * Progress charts to help children track progress * Parental notes to support learning at home * Weekly tests to improve understanding and retention

The Zones of Regulation Leah M. Kuypers 2011 "... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

KS3 Maths Teacher Pack 1.2 (Maths Frameworking) Kevin Evans 2021-04-22 Plan and deliver engaging lessons with this pick-up-and-go Teacher Pack. It is perfectly matched to Pupil Book 1.2, the middle tier for the first year of teaching KS3. Great for cover lessons, NQTs, teaching assistants or more experienced teachers in search of ideas.

Maths, Stage 7 Naomi Norman 2017-12 This brand new, three-level series, provides coverage of the Cambridge Secondary 1 maths curriculum framework. Written by an experienced author team, the series comprises a comprehensive Student Book, extensive Workbook and supportive Teacher Guide. Student Book 7 provides comprehensive coverage of the Secondary 1 syllabus through 9 topic-based units. The series is influenced by a mastery approach, with topics being thoroughly embedded before learners move on. * New concepts are presented through worked examples, which lead learners, step-by-step, through the concepts, with clear and detailed explanations. * Links are made between topics, encouraging learners to build on relevant fluency from previously learnt topics, and practise mathematical concepts in a different context. * Learners build 21st-century skills such as mental maths strategies, pattern spotting and problem solving, enabling them to talk about mathematics with confidence. * With challenge questions integrated throughout, learners can deepen their understanding. * Learners are encouraged to reflect on their learning, in order to build learner independence. * The series builds on the foundations laid down in primary maths, and prepares learners for embarking on IGCSE maths. Collins is working closely with Cambridge International Examinations towards endorsement of the series.
