Events and the Social Sciences Hazel Andrews 2013-02-08 As the events management field expands as an area of study, there is a need to move beyond the business and marketing-driven approaches which dominate the literature towards a more advanced conceptual analysis and understanding of events from a socio-cultural context. This book addresses this need by examining intersections between the social sciences and the emerging field of events management. It applies and specifically contextualises social science theories within the discourse of events to provide a greater understanding of the significance of events in contemporary society. It first outlines the value of approaching the study of events from a social science perspective, and then moves on to an in-depth exploration of relevant theories exploring topics such as identity, culture, consumerism, representation and place. It concludes with a summary of each chapter and a discussion of ways in which events can be further explored through the lens of the social sciences. The book features international case studies based on a variety of event types ranging from sports events, religious and cultural events and community events, which are used throughout to address contemporary issues and show theory in practice. 'Think Points' are integrated into each chapter to encourage the reader to reflect on theories, and each chapter concludes with summary points, further reading and links to useful websites to consolidate learning and further knowledge. International Event Management Hugues Seraphin 2018-06 The event industry is a robust economic force worldwide. It spans into many other important sectors like travel, tourism, hospitality, technology, media and communication, inter alia. In America, it is estimated that 18 million events are organised yearly, generating approximately \$280 billion in spending and \$66.8 billion in labour

income (Event Industry Outlook 2016). Events showcase talent and are perhaps those moments when societies and communities group together to revive certain traditions and cultures, which are otherwise dormant. In other contexts, like the case of tourism, events create economic value for the hosting destination, which boosts the economy. In contrast to permanent attractions, an event has the potential to promote authenticity and hence, is increasingly tapped by marketers for the purpose of differentiation. For instance, destinations celebrate their unique culture and heritage through events which represent important milestones in their tourism history. Given their capacity to attract visitors and generate profit, tourism destinations are increasingly capitalising on events as a diversification strategy. This trend has undoubtedly precipitated popularity in event studies and hence the writing of this book. The landscape of the book covers a broad spectrum of research. The chapters explore the changing dimensions in the industry based on the following themes: - Event Management Trends and Policies - Events and Destination Image and Preference - Events and Education - Events, Attendees and Organisers In the present book, an attempt is made to cover a wide range of events (sport, cultural, festivals and weddings) and issues related to the organisation and management of these events (policies, terrorism, etc.). The chapters also provide solutions and strategies for the organisation of successful events (protocol, etc.). The book also offers an opportunity to understand attendees from a consumer behaviour point of view. More importantly, some chapters cover events from an education point of view by examining the question from both a Higher Education perspective (universities) and an event organiser angle (what is done to make people aware of sustainability). The editors have invited academics from Africa (Kenya, Algeria), South America (Argentina), Europe (England, Italy and Greece), and the Middle East (Abu Dhabi) to contribute thirteen chapters in the fields of their expertise. With its perfect combination of theoretical and practical issues, this book aims to share with readers the knowledge needed to professionally manage events in different fields. The latest trends including the key theories, concepts and case studies related to event management are presented in a manner that intellectually stimulates readers to get ready for an experiential learning journey. This book will enable readers to understand the impact of events on destination management organisations, explain the role of events in promoting international sport competitions, and understand the key issues in planning and designing collaborative partnerships in event management. Each chapter features a real-life case study to highlight key concepts and replace theoretical concepts with practical solutions to effectively approach the organisation of events, as well as preparing readers to tackle any challenges they might face in their future opportunities to manage events.

Event Management and Sustainability Razaq Raj 2009 Sustainable management is an important consideration for businesses and organisations, and the enormous number of tourism events taking place requiring facilities, power, transport, people and much more makes sustainable event planning a considerable priority. Introduction to Sports Tourism and Event Management, An M. Saayman 2012-08-01 The importance of Sport Tourism as a developing science and Sport Events specifically is on the increase. This is especially true when experts say that sport tourism is big business. South Africa, like most other countries, hosts thousands of sport events each year. Therefore, destinations compete fiercely not only to host these events but also to offer quality events. All this is happening despite the fact that there is a lack of properly trained sport and event managers. Therefore, the purpose of this book is to equip the reader with specific knowledge and skills about the sport and events tourism phenomenon. The book deals with a wide variety of topics, stretching from the history of sport tourism to new and globally important issues such as the greening of sport events. The book is a useful tool for both students and practitioners alike, since it also provides guidelines and case studies.

Humans, Horses and Events Management Katherine Dashper 2021-03-12 Horses are perhaps the most common non-human animal to feature in planned events, but although there is considerable research on equestrian sport, there is virtually none on equestrian events. This book begins to address this gap, using the National Championships of the Icelandic Horse as an extended case study to explain in depth the process of managing an event, as well as the larger theoretical implications of events management. Drawing on diverse viewpoints and theoretical perspectives, the book draws wider comparisons to connect events management to larger themes in the social sciences, such as human-animal relations; nationalism; place branding; event impacts; event experience; and inclusion and exclusion. The book is a contribution to two fields. In relation to human-animal studies, it focuses on how the Icelandic horse breed is marketed and celebrated through top-tier competition; whereas from an events management perspective, it considers the role of the event in community building, the practical and theoretical aspects of running a sustainable equestrian event, and the issues that arise in multispecies event contexts.

Event Leadership Emma Abson 2021-04-30 Event Leadership: Theory and practice for event management and tourism examines, contextualises and applies leadership theory and practice at several levels. Using a wide range of contemporary research, this book explores in detail a range of leadership theories, providing insight into the developments that are driving leadership today. In light of the complex business needs of event organisations and in order to illustrate the concepts discussed, examples of case studies from the event sector are used throughout. Providing a comprehensive grounding in leadership theory, this book explores leadership in events from three distinct viewpoints using various event settings and types of events to illustrate: \* "The leader" within event organisations: looking at leaders who are founders, or those that have been appointed, elected, evolved from other positions or emerged from a crisis - all of which have their own issues and effects.\* Leadership within the events community, such as political leadership or leaders within event portfolios and networks. Questioning what does it take to achieve effective collaboration among events and between events and other key stakeholders? Is it the individual leader, or leadership that emerges from network dynamics?\* The leadership role that events and professional organisations play in society, such as educational and inspirational leadership - looking at social marketing through events, with the aims of changing attitudes and behaviour. Part of the Event Management Theory and Methods Series. This series examines the extent to which mainstream theory is being employed to develop event-specific theory, and to influence the very core practices of event management and event tourism. **Event Impact Assessment Donald Getz 2018-11-30** Impact assessment can be highly technical and complex, requiring a broad knowledge base and diverse skills, but like evaluation, it is a process fraught with philosophical, technical and political perils. Why is it done, by whom, and how, must be carefully planned. Impacts cannot always be 'proven', so the nature of evidence becomes critical. Accordingly, a strong theoretical base is needed by all IA practitioners. Whilst economic impacts have received a great deal of attention, with sufficient material available to guide all applications, for social, cultural and environmental IA the theory and practice has lagged. In the context of Triple Bottom Line, social responsibility and sustainability approaches most of the available literature is on normative goals (such as going green, meeting sustainability standards), the nature of positive and negative impacts (a descriptive approach or based on public input), or theory about how impacts occur; very little theory development or praxis has been directed at impact assessment for these applied fields. In response to this lack of information, Event Impact Assessment is the first text to: \* Develop professionalism for IA and evaluation in these applied management fields.\* Position impact assessment within sustainability and responsibility paradigms.\* Recommend goals, methods and measures for planning, evaluation and impact assessment pertaining to events and tourism.\* Encourage the adoption of standard methods and key performance indicators in evaluation and impact assessment in order to facilitate valid comparisons, benchmarking, reliable forecasts, transparency and accountability.\* Provide concepts and models that can be adapted to diverse situations.\* Connect readers to the research literature through use of Research Notes and provision of additional readings. This text also works well as a companion text to Event Evaluation: Theory and methods for event management and tourism. The Events Management Theory and Methods Series examines the extent to which mainstream theory is being employed to develop event-specific theory, and to influence the very core practices of event management and event tourism. Each compact volume contains overviews of mainstream management theories and methods, examples from the events literature, case studies, and guidance on all aspects of planned-event management. They introduce the theory, show how it is being used in the events sector through a literature review, incorporate examples and case studies written by researchers and/or practitioners, and contain methods that can be used effectively in the real world. Series editor: Donald Getz. With online resource material, this mix-and-match collection is ideal for lecturers who need theoretical foundations and case studies for their classes, by students in need of reference works, by professionals wanting increased understanding alongside practical methods, and by agencies or associations that want their members and stakeholders to have access to a library of valuable resources.
