2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these

were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

The Dynamics of News and Indigenous Policy in Australia Kerry McCallum 2017-08-01 Despite intense concern among academics and advocates, there is a deeply felt absence of scholarship on the way media reporting exacerbates rather than helps to resolve policy problems. This book offers rich insights into the news media's role in the development of policy in Australia, and explores the complex, dynamic and interactive relationship between news media and Australian Indigenous affairs. Spanning a twenty-year period from 1988 to 2008, Kerry McCallum and Lisa Waller critically examine how Indigenous health, bilingual education and controversial legislation were portrayed through public media. The Dynamics of News and Indigenous Policy in Australia provides evidence of Indigenous people being excluded from policy and media discussion, as well as using the media to their advantage. To that end, the book poses the question: just how far was the media manipulating the national conversation? And how far was it, in turn, being manipulated by those in power? A decade after the Australian government introduced the controversial 2007 Northern Territory Emergency Response Act, McCallum and Waller offer a ground-breaking look at the media's role in Indigenous issues and asks: to what extent did journalism exacerbate policy issues, and how far were their effects felt in Indigenous communities?

From Able to Remarkable Robert Massey 2019-10-04 In From Able to Remarkable: Help your students become expert learners, Robert Massey provides a pathway to help teachers guide their students through the gauntlets of the gifted, the underpasses of underachievement and the roadblocks to remarkable on their learning journeys. What makes remarkable students remarkable? Attributes such as resilience, curiosity and intelligence may come to mind and we might also add others, such as intuition and tenacity. But what has helped make them what they are? Were they born this way, or did their 'remarkabilities' emerge during their schooling? Such questions may make teachers feel uneasy, prompting them to reflect on the sometimes limiting scope of what is often labelled as 'gifted and talented provision' in their school. Robert Massey argues, however, that these remarkabilities are there, latent and dormant, in many more students than we might at first acknowledge. In From Able to Remarkable Robert shares a rich variety of practical, cross-curricular strategies designed to help teachers unearth and nurture these capabilities and signpost a route to the top for every learner. Informed by educational research and evidence from the field of cognitive science, the book talks teachers through a wide range of effective teaching and learning techniques all of which are appropriate for use with all pupils and not only with top sets or high attainers. Robert also shares ideas on how teachers can improve their students' abilities to receive, respond to and then deliver feedback on both their own work and that of others. To complement the feedback process, he presents practical methods to help teachers make questioning, self-review and greater student ownership of their questioning within lessons a staple of day-to-day classroom interaction. Venturing beyond the classroom, the book also explores approaches to whole-school provision for high-attaining students and offers some robust stretch and challenge to educational leaders in considering what widespread excellence in education might look like. Suitable for teachers and gifted and talented coordinators in both primary and secondary schools.
