Crime in Ireland, 1945-95 John D. Brewer 1997 This book establishes Ireland's unique contribution to criminological research, addressing the effects on crime of its peculiar patterns of industrialization and social change, as well as the effect on ordinary crime of a quarter of a century of civil unrest and terrorism. Crime trends are explored over a fifty-year period between 1945-95 at the national level for the two countries as a whole, and at a city level for Belfast and Dublin. Trends in specific categories of crime, from murder to rape and drug crime, are also explored over the same period. The book makes a significant contribution by supplementing statistical material with ethnographic data. It reports on in-depth interview material among residents in two areas of Belfast, one in largely Catholic West Belfast and the other in largely Protestant East Belfast. In these interviews, those questioned speak of their own experiences of crime, the police, and the paramilitary organizations.

Globalisation and the Challenges of Development in Contemporary India Sita Venkateswar 2016-03-14 This volume brings together multidisciplinary, situated and nuanced analyses of contingent issues framing a rapidly changing India in the 21st century. It moves beyond the ready dichotomies that are often extended to understand India as a series of contrasts and offers new insights into the complex realities of India today, thereby enabling us to anticipate the decades to come. The editors focus on three major themes, each discussed in a section: The first section, Framing the Macro-Economic Environment, defines the framework for interrogating globalisation and socio-economic changes in India over the last few decades of the 20th century spiraling into India in the 21st century. The next section, Food Security and Natural Resources, highlights critical considerations involved in feeding a burgeoning population. The discussions pose important questions in relation to the resilience of both people and planet confronting increasingly unpredictable climate-induced scenarios. The final section, Development, Activism and Changing Technologies, discusses some of the social challenges of contemporary India through the lens of inequalities and emergent activism. The section concludes with an elaboration of the potential and promise of changing technologies and new social media to build an informed and active citizenry across existing social divides.

Contesting Crimmigration in Post-hukou China Tian Ma 2022-08-11 This book focuses on the criminalization trend and process regarding the internal migration in contemporary China from the perspective Law-in-Action. In Chinese society today, internal migrants are commonly perceived as criminals. Crimmigration, a global term that communicated the convergence of the criminal legal system and the immigration enforcement system, manifest itself in China's hukou-based (also known as the household registration system) criminal legal system. How hukou has been constructed into the concept of Crimmigration in China strikes at the core of the ultimate questions of this book: who is being criminalized, how does the political-economic-cultural institution known as 'hukou' shape the criminal justice process, and how has the role of hukou changed over time in the ever-changing process? Drawing on interviews with police, prosecutors, criminal lawyers & judges, prison staff and migrant leaders in Yangtze River Delta, China, this book reflects on a historical development on hukou and its function in social control. Each chapter contributes to an extended analysis of pragmatic aspects of decision-making moments in the criminal justice system. This book will appeal to

criminology researchers and students with an interest in law, politics, migration, and citizenship in contemporary China.

Choosing the Future for American Juvenile Justice David S. Tanenhaus 2014-05-02 This is a hopeful but complicated era for those with ambitions to reform the juvenile courts and youth-serving public institutions in the United States. As advocates plea for major reforms, many fear the public backlash in making dramatic changes. Choosing the Future for American Juvenile Justice provides a look at the recent trends in juvenile justice as well as suggestions for reforms and policy changes in the future. Should youth be treated as adults when they break the law? How can youth be deterred from crime? What factors should be considered in how youth are punished? What role should the police have in schools? This essential volume, edited by two of the leading scholars on juvenile justice, and with contributors who are among the key experts on each issue, the volume focuses on the most pressing issues of the day: the impact of neuroscience on our understanding of brain development and subsequent sentencing, the relationship of schools and the police, the issue of the school-to-prison pipeline, the impact of immigration, the privacy of juvenile records, and the need for national policies—including registration requirements—for juvenile sex offenders. Choosing the Future for American Juvenile Justice is not only a timely collection, based on the most current research, but also a forward-thinking volume that anticipates the needs for substantive and future changes in juvenile justice.

Child Sexual Abuse Reported by Adult Survivors Sinéad Ring 2022-04-29 Child Sexual Abuse Reported by Adult Survivors is a wide-ranging and timely critical history and analysis of legal responses to 'historical' or 'non-recent' child sexual abuse (NRCSA) in England and Wales, Ireland and Australia, each of which represents an evolving and progressive approach to this important and complex issue. The book examines the emergence of NRCSA as a distinctive social, political and legal phenomenon in each country and explores the legal responses developed to address its unprecedented challenges. Courts and parliaments in each country have reformed existing doctrine and practice and have created new ways of holding state and private actors accountable and new ways of addressing survivors' injuries. Criminal law, tort law, public inquiries and state reparations have all been to the forefront of these new legal responses, which have transformed law's engagement with NRCSA survivors and understandings of justice itself. However, despite this undeniable progress, the book identifies ways in which the legal responses developed in each country fail to deliver accountability and recognition to NRCSA survivors and argues that such failures betray the law's inherent ambivalence to delivering justice for these survivors. Creating new insights into legal responses to this complex contemporary legal, social and political problem, this book will be of great interest to academic lawyers, political scientists and historians, as well as those working on related topics in criminology, sociology, social policy, cultural studies and gender studies.

Fundamentals of Criminology Kelly Frailing 2013-07-19 *Fundamentals of Criminology: New Dimensions* delivers a comprehensive and comprehensible introduction to the discipline of criminology. As the title implies, it covers the fundamentals of criminology, including the major theories of crime causation, classic and current empirical tests of those theories, the strengths and weaknesses and the policy implications of each. It also describes the types of crime and provides current rates, trends over time and theoretical explanations for each, as well as a discussion of characteristics of offenders and victims. What sets this book apart from the many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology. The new dimensions in this book include but are not limited to research designs in criminology, new theories of crime causation, crime in different contexts, connections between criminology and criminal justice policy and a number of lingering issues for both disciplines. In combination with the fundamentals, these new dimensions are designed to provide readers with the richest, most complete understanding of what crime is, how much of it there is, what causes it and what do to about it, as well as the ability and desire to pose important questions for the future of both criminology and criminal justice. "The authors have produced a comprehensive, readable, and thoroughly interesting text covering the topic of sociological criminology. Yes, there are a plethora of texts in this area, but Harper and Frailing's addition to the field has a number of features moving it ahead of the competition. There is in-depth coverage of emerging areas in crime, including cybercrime and human trafficking, as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship. The authors' arguments for evidence-based crime prevention strategies and public policies are compelling. *Fundamentals of Criminology* is worthy of the closest consideration by instructors teaching undergraduate criminology courses." — Jay Corzine, professor of sociology, University of Central Florida

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Captured by the Media Paul Mason 2006 Captured by the Media explores the increasingly important issue of media and popular discourse on prisons and punishment, and its relationship to public attitudes and government penal policy. In providing such an analysis this book draws upon work from academics, prison and media practitioners, addressing questions of cultural constructions and consumptions of penal discourse in media and culture. This book turns on the television, opens the newspapers, goes to the cinema and assesses how punishment is performed in media culture and investigates the regimes of penal representation. It places media discourse on prisons firmly within the penal policy/public opinion complex and suggests that while The Shawshank Redemption, internet jail cams, advertising and debates about televising executions continue to ebb and flow in contemporary culture, the persistence of this spectacle of punishment its contested meaning and its politics of representation demands investigation. Alongside contributi

The Development of Child Protection Law and Policy Kieran Walsh 2020-04-02 This book examines how child protection law has been shaped by the transition to late modernity and how it copes with the ever-changing concept of risk. The book traces the evolution of the contemporary child protection system through historical changes, assessing the factors that have influenced the development of legal responses to abuse over a 130-year period. It does so by focussing on the Republic of Ireland where child protection has become emblematic of wider social change. The work draws on a wide range of primary and secondary sources including legislation, case law and official and media reports of child protection inquiries. It also utilises insights developed through an extensive examination of parliamentary debates on child protection matters. These materials are assessed through the lens of critical discourse analysis to explore the relationship between law, social policy and social theory as they effect child protection. While the book utilises primarily Irish sources, this multidisciplinary approach ensures the argument has international applicability. The book will be a valuable resource for all those with an interest in the development of child protection law.

Fear of Crime and Punitiveness Helmut Kury 2013 As a subject area of inquiry and research, fear of crime and punitiveness have played an increasingly important role in criminology. Since the early 1990s, and emanating largely from within the United States, there has been a growing body of research as well as increased attention given to the subject by the media and policy-makers. In part, triggered by the fact that the United States has the highest imprisonment rate (approx. 780/100,000 in 2012) in the Western world and still has the death penalty in most states, increasing attention has been paid to the impact of peoples' perceptions of crime, their fear of possible victimization, and their sense of punitivity towards offenders. And although the body of literature on fear

of crime and punitivity has been growing, there still remain many regions and countries of the world where there is a dearth of such research. This collection includes several of the countries where such research represents the first of its kind. The reader will be provided a broad overview of the subject and presented with varied observations about fear of crime and punitivity from different parts of the world. As the project represents a novel and exploratory venture into the subject area, the collective content provided in this collection will hopefully also serve to advance future research and inform sentencing policy and initiatives to address fear of crime. This volume includes seven comparable reports in which the contributors used a common standardized survey to collect data on fear of crime and punitivity among post-secondary students. The countries represent a cross-section of different legal, political, and cultural systems. The countries also vary in their degree of criminal justice development and in terms of the rights of victims. In each of the contributions, the author(s) provide an overview of their country before discussing the results of the survey they administered. The articles are prepared in a manner that allow varying degrees of comparison as well as recommendations for the future direction of this relatively new area of international inquiry. - Cover.

State, Power, Crime Roy Coleman 2009-10-16 'Following the outstanding introduction by the authors there are fifteen excellent original articles devoted to an integrated theory of the relationship between the state and crime. This work is on the cutting edge of critical criminology. It is a must read.' - William J. Chambliss, Professor of Sociology, The George Washington University, USA. 'This book is a superb compilation of original papers by an impressive roster of authors. While the articles cover a wide range of empirical issues, from Northern Ireland and corporate crime to youth crime and heterosexual hegemony they all explore the implications, strategies and mechanisms of state power. There isn't a weak paper here: all are extensively documented, well written, persuasive and scholarly in the very best sense.' - Professor Lauren Snider, Queens University, Canada 'State, Power, Crime is a hugely important book for these times. Bringing together some of the most original minds in criminology it offers a critical analysis of the state, how it constructs crime, responds to it and, at times, engages in the very same. The book is essential reading for anyone interested in justice, freedom and equality.' - Paddy Rawlinson, London School of Economics Featuring contributions by many of the leading scholars in the field, this seminal text explores the key themes and debates on state power today, in relation to crime and social order. It critically evaluates a range of substantive areas of criminological concern, including terrorism, surveillance, violence and the media. State, Power, Crime provides: "historical overviews of key theories about state power " assessment of the relationship between crime, criminal justice and the state " analysis of the development of law and order policy " discussion of the impact of structural fissures such as gender, race and sexuality " an overview of current research and writing " critical reflection on the future direction of research and analysis " advice on further reading. In 1978, with the publication of Hall et al's Policing the Crisis and Poulantzas's State, Power, Socialism, the complexity of the state's interventions in maintaining a capitalist social order were laid bare for critical criminological analysis. State, Power, Crime offers an up-to-date and comprehensive examination of the challenges posed by state power, in relation to both criminal and social justice.
