Global Business Strategy Kazuyuki Motohashi 2015-03-25 This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

The Absolutely Essential Health and Safety Toolkit for the Smaller Construction Contractor HEALTH AND SAFETY EXECUTIVE. HSE. 2008-06 Includes a section on working at height, and a section on ladders. This title provides a checklist for health and safety problems on small construction sites. It helps you manage or avoid them and to ensure your own health and safety as well as the health and safety of the people who work for you and others such as the public.

Industrial Innovation in China Zhenyu Fu 2021-09-30 This book, based on extensive original research, examines the factors which lead to successful innovation in Chinese industry. Considering the large and important Chinese mining industry in detail, it argues that innovation is key for success in all industries, not just new "tech" industries. It reveals how the interaction of universities, governments and industries is highly significant, considers how some parts of the industry, such as the mining and mineral processing stages, are more innovative than other stages, such as prospecting and mining equipment manufacturing, and suggests that this is explained both by the distance between final products and the market and commercialisation, and by the intensity of the interaction between the industrial company and the university or research institute. Throughout, the book includes examples and case studies to highlight the points made.
