It is a potent mix of grit, cobbles, steep climbs, narrow roads, national pride, beer, brutal weather and the maddest, most passionate fans in the sport. It's the Tour de France boiled down into a single day of non-stop action – the Belgian equivalent of the Grand National, Wimbledon and the FA Cup final. And there's yet more to it than that. Edward Pickering tells the story of the Tour of Flanders, its history, culture and meaning, through the prism of the 2011 Ronde, an incredible edition that was one of the most exciting bike races of the past half-century. He weaves the narrative of that day into a broader study of the race, with eyewitness accounts from the key locations of the Ronde and dozens of interviews with the riders. The Ronde is a textured portrait of a race, but it also explores the deep links between bike races and the landscape and culture in which they take place, and explains how cycling works, with the most detailed analysis of a single event ever seen.

**Strengthening Forensic Science in the United States** National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
