The Bell Jar Sylvia Plath 2018-07-29 This carefully crafted ebook: "The Bell Jar" is formatted for your eReader with a functional and detailed table of contents. Esther Greenwood, a young woman from the suburbs of Boston, gains a summer internship at a prominent magazine in New York City, under editor Jay Cee; however, Esther is neither stimulated nor excited by either the big city or the glamorous culture and lifestyle that girls her age are expected to idolize and emulate. She instead finds her experience to be frightening and disorienting. From hereafter her mental state keeps deteriorating until she starts feeling helpless as if being kept inside a glass bell jar! The Bell Jar is the only novel written by the American writer and poet Sylvia Plath. Originally published under the pseudonym "Victoria Lucas" in 1963, the novel is semi-autobiographical, with the names of places and people changed. The book is often regarded as a roman à clef because the protagonist's descent into mental illness parallels Plath's own experiences with what may have been clinical depression or bipolar II disorder. Plath died by suicide a month after its first UK publication. The novel was published under Plath's name for the first time in 1967 and was not published in the United States until 1971, in accordance with the wishes of both Plath's husband, Ted Hughes, and her mother.

The White Coat Investor James M. Dahle 2014-01 Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor

Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For The White Coat Investor "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S. Observing the Observer Zahid Bukhari 2012 THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an "Islam industry" run primarily by fly-by journalists, think tank pundits, and cut-and-paste "experts."

Medicolegal Death Investigation System Institute of Medicine 2003-08-22 The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions that followed them.
