and Wooster novel 'It's hard to single out one book as the entire Jeeves and Wooster collection is Bach Rescue Remedy in literary form, but this tale of romantic imbroglia is a priceless hoot... Every sentence is a perfectly wrought delight.' Independent At Deverill Hall, an idyllic Tudor manor in the picture-perfect village of King's Deverill, impostors are in the air. The prime example is man-about-town Bertie Wooster, doing a good turn to Gussie Fink-Nottle by impersonating him while he enjoys fourteen days away from society after being caught taking an unscheduled dip in the fountains of Trafalgar Square. Bertie is of course one of nature's gentlemen, but the stakes are high: if all is revealed, there's a danger that Gussie's simpering fiancée Madeline may turn her wide eyes on Bertie instead. It's a brilliant plan - until Gussie himself turns up, imitating Bertram Wooster. After that, only the massive brain of Jeeves (himself in disguise) can set things right.

The Pinks Chris Enss 2017-07-01 The true story of Kate Warne and the other women who served as Pinkertons, fulfilling the adage, "Well-behaved Women Seldom Make History." Most students of the Old West and American law enforcement history know the story of the notorious and ruthless Pinkerton Detective Agency and the legends behind their role in establishing the Secret Service and tangling with Old West Outlaws. But the true story of Kate Warne, an operative of the Pinkerton Agency and the first woman detective in America—and the stories of the other women who served their country as part of the storied crew of crime fighters—are not well known. For the first time, the stories of these intrepid women are collected here and richly illustrated throughout with numerous historical photographs. From Kate Warne's probable affair with Allan Pinkerton, and her part in saving the life of Abraham Lincoln in 1861 to the lives and careers of the other women who broke out of the Cult of True Womanhood in pursuit of justice, these true stories add another dimension to our understanding of American history.

Walkable City Jeff Speck 2012-11-13 Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly

urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, *Walkable City* lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

**The Cloud Revolution** Mark P. Mills 2021-10-19 The conventional wisdom on how technology will change the future is wrong. Mark Mills lays out a radically different and optimistic vision for what's really coming. The mainstream forecasts fall into three camps. One considers today as the "new normal," where ordering a ride or food on a smartphone or trading in bitcoins is as good as it's going to get. Another foresees a dystopian era of widespread, digitally driven job- and business-destruction. A third believes that the only technological revolution that matters will be found with renewable energy and electric cars. But according to Mills, a convergence of technologies will instead drive an economic boom over the coming decade, one that historians will characterize as the "Roaring 2020s." It will come not from any single big invention, but from the confluence of radical advances in three primary technology domains: microprocessors, materials, and machines. Microprocessors are increasingly embedded in everything. Materials, from which everything is built, are emerging with novel, almost magical capabilities. And machines, which make and move all manner of stuff, are undergoing a complementary transformation. Accelerating and enabling all of this is the Cloud, history's biggest infrastructure, which is itself based on the building blocks of next-generation microprocessors and artificial intelligence. We've seen this pattern before. The technological revolution that drove the great economic expansion of the twentieth century can be traced to a similar confluence, one that was first visible in the 1920s: a new information

infrastructure (telephony), new machines (cars and power plants), and new materials (plastics and pharmaceuticals). Single inventions don't drive great, long-cycle booms. It always takes convergent revolutions in technology's three core spheres—information, materials, and machines. Over history, that's only happened a few times. We have wrung much magic from the technologies that fueled the last long boom. But the great convergence now underway will ignite the 2020s. And this time, unlike any previous historical epoch, we have the Cloud amplifying everything. The next long boom starts now.

Fighters James Morton 2005-01-01 In July 1965 Freddie Mills, popular former light heavyweight champion of the world, was found shot in an alleyway off London's Charing Cross Road. Was he murdered and if so by whom? Did he kill himself and if so why should this happily married man whose popularity was immense take his own life? A year later Britain's second world champion of the era, the middleweight Randolph Turpin who defeated the fabulous Sugar Ray Robinson, was found shot dead in a room above his cafe in Leamington Spa. How did this man who earned thousands during his career come to end his life in a backstreet cafe? Or was he also murdered to prevent him getting the money due to him from his career? Morton looks at the role of their managers and promoters and the relationship with the Boxing Board of Control. Should many of Mills' fights and some of Turpin's have been sanctioned? Is this in part what led to their deaths? Where did their money go? Gambling, women, protection? Is there any possible truth in the persistent rumours that Mills was the so-called Jack the Stripper, killer of prostitutes in Hammersmith?

Too Big to Walk: The New Science of Dinosaurs Brian J. Ford 2018-05-31 Ever since Jurassic Park we thought we knew how dinosaurs lived their lives. In this remarkable new book, Brian J. Ford reveals that dinosaurs were, in fact, profoundly different from what we believe, and their environment was unlike anything we have previously thought.

The Licit Life of Capitalism Hannah Appel 2019-12-13 The Licit Life of Capitalism is both an account of a

specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

The UFO Files David Clarke 2013-03-30 'What does all this stuff about flying saucers amount to? What can it mean? What is the truth?' Winston Churchill, prime minister's personal minute, 28th July 1952 The UFO Files tells the story of over 100 years of UFO sightings, drawing on formerly secret government documents at the National Archives in London. Alongside extraordinary reports by ordinary people, it reveals details of official interest and investigations stretching back more than 80 years. In this remarkable book, fully updated for this second edition, David Clarke reveals an array of startling stories from possible UFO reports hidden among Met Office investigations of aerial phenomena in the 1920s to the conclusions of Project Condign, the secret British Intelligence UFO study completed in 2000. As well as covering Roswell and Britain's own Rendlesham Forest mystery, Clarke raids the records for dramatic stories of abductions and close encounters, ghost aircraft and crop circles, and UFO reports by both civilian aircrew and military personnel. Dramatic witness statements and interviews combine with rarely seen photographs, drawings and newly available documents to offer a unique guide to one of our most

intriguing mysteries.

War Game Michael Foreman 2006-10-23 A special lavishly illustrated new edition of Michael Foreman's classic story. It's 1914 when everything changes for a group of boys growing up and playing football in the

Suffolk countryside. Far away, in a place called Sarajevo, an Archduke has been killed and a web of global events results in a call for all British men to do their duty 'for King and Country' and join the army to fight the Germans overseas. The boys sign up for what sounds like an adventure and a chance to see the world. After basic training the boys sail to France where they find themselves fighting on the front line. Living in the trenches in constant fear for their lives is nothing like they expected and only a bombed-out wasteland, no-man's-land, separates their trenches from those of their German enemies. Then, on Christmas Day, something remarkable happens as the German and British armies stop fighting and meet in the middle of no-man's-land. The enemies talk, play football and become friends. But the war isn't over, the two sides resume fighting and the group of Suffolk lads are ordered to charge across no-man's-land...

Responsive Regulation Ian Ayres 1995-02-16 This book transcends current debate on government regulation by lucidly outlining how regulations can be a fruitful combination of persuasion and sanctions.

The regulation of business by the United States government is often ineffective despite being more adversarial in tone than in other nations. The authors draw on both empirical studies of regulation from around the world and modern game theory to illustrate innovative solutions to this problem. Their ideas include an argument for the empowerment of private and public interest groups in the regulatory process and a provocative discussion of how the government can support and encourage industry self-regulation.

Karloff and the East Scott Allen Nollen 2021-01-13 Among Golden Age Hollywood film stars of European heritage known for playing characters from the East--Chinese, Southeast Asians, Indians and Middle Easterners--Anglo-Indian actor Boris Karloff had deep roots there. Based on extensive new research, this biography and career study of Karloff's "eastern" films provides a critical examination of 41 features, including many overlooked early roles, and offers fresh perspective on a cinematic luminary so often labeled a "horror icon." Films include *The Lightning Raider* (1919), 14 silent films from the 1920s, *The Unholy Night* (1929), *The Mask of Fu Manchu* (1932), *The Mummy* (1932), John Ford's *The Lost Patrol* (1934), the Mr. Wong series (1938-1940), *Targets* (1968), and *Isle of the Snake People* (1971), one of six titles released posthumously.

Economic Security Sheila R. Ronis 2012-04-20 Historically, national security includes the strength of our nation's infrastructure, the foundation upon which the continuous growth of our society depends. This includes our strong societal and moral codes, the rule of law, stable government, social, political, and economic institutions, and leadership. Also included are our nation's schools and educational programs to ensure a knowledgeable citizenry and lifelong learning--a must for a democracy. Our nation's strength also requires investments in science, engineering, research and development, and technological leadership. We cannot be strong without a viable way to power our cities, feed ourselves, and move from one place to another. Most of all, a strong economy is an essential ingredient of a global superpower. Without it, we will lose our superpower status, and quickly. National security must include a healthy

market-based economy, with a strong base of globally competitive products and services that produce jobs. This economy must include sound government policies to promote responsible choices and reduce our debt, and grand strategies for energy and environmental sustainability, science and technology leadership (at least in some areas), human capital capabilities, manufacturing, and the industrial base. And these are not the only components. National security goes to the very core of how we define who we are as a people and a free society. It concerns how we view our world responsibilities. Economic security is a major element of national security, even as borders are less important than ever. No matter how we look at national security, there can be no question of the need to include the economic viability of our nation. Without capital, there is no business; without business, there is no profit; without profit, there are no jobs. And without jobs, there are no taxes, and there is no military capability. The viability of a nation's industrial infrastructure, which provides jobs for its people, creates and distributes wealth, and leverages profits, is essential. Without jobs, the quality of peoples' lives deteriorates to a point where society itself can disintegrate. It can also lead to strife on many different levels. As a nation, we need to find a strategy to deal with this, and we will discuss the ideas of expeditionary economics. But poverty is not only a problem in Third World countries. It can occur at home, too-especially during a deep recession. No community, local or global, can sustain indefinitely whole populations of "haves" and "have nots." And that gap is now growing within the United States. There is no question that a part of the infrastructure of a nation must include a sound economy. It was the relative deterioration of the Japanese and German economies that led those nations into World War II. Poverty around the world is a global systemic issue that frequently can and does lead to political instability. But we cannot help others if we cannot help ourselves, and our current economic crisis is a warning. National security is societal, political, and economic strength. In today's world, national security for a superpower is meaningless without a strong military capability as well. The sovereignty and security of the United States, and the protection of its citizens and property around the world, remain the bedrock of national security. The execution of U.S.

national security strategy is conducted in a highly volatile global environment characterized by quantum changes in technology; unprecedented social, economic, and political interdependencies; broadened opportunities to foster democratic principles; and allegiances and alliances frequently founded on interests other than traditional nationalism. Understanding the complex systems nature of national security and why the economy is a part of the equation is crucial. National Defense University.

Long Walk To Freedom Nelson Mandela 2013-04-25 These memoirs from one of the great leaders of our time are 'essential reading for anyone who wants to understand history - and then go out and change it'

Barack Obama The riveting memoirs of the outstanding moral and political leader of our time, Long Walk to Freedom brilliantly re-creates the drama of the experiences that helped shape Nelson Mandela's destiny. Emotive, compelling and uplifting, Long Walk to Freedom is the exhilarating story of an epic life; a story of hardship, resilience and ultimate triumph told with the clarity and eloquence of a born leader. 'Enthralling . . . Mandela emulates the few great political leaders such as Lincoln and Gandhi, who go beyond mere consensus and move out ahead of their followers to break new ground' Sunday Times 'The authentic voice of Mandela shines through this book . . . humane, dignified and magnificently unembittered' The Times 'Burns with the luminosity of faith in the invincible nature of human hope and dignity . . . Unforgettable' Andre Brink

What Universities Owe Democracy Ronald J. Daniels 2021-10-05 "This book identifies four distinct functions of American higher education that colleges and universities have acquired over the past two hundred years and that are integral to liberal democracy: social mobility, citizenship education, the discovery and communication of knowledge, and the cultivation of a pluralistic society. Each chapter takes up one of these functions to analyze and assess"--

The Cutter Michael Litchfield 2011 When Heather Barnett happily opened her front door to a caller one morning in November 2002, little did she know that she was about to come face to face with her killer. Tragically, her mutilated body was discovered by her son and daughter on their return home from school

that day. The police quickly ascertained that the murder was premeditated and meticulously planned to the last macabre detail; the killer had not left a single DNA clue—even the bloody footprints made by a distinctive pair of trainers did not lead out of the house but ended in the front room, without further trace. As a bizarre and sickening calling card, the killer had placed a lock of someone else's hair in the victim's hand. Detectives were shocked by the savagery of the murder and baffled by the apparently sadistic ritualism of the killing. Many long months of enquiries followed and, eventually, a lead came from Interpol: the parents of a missing girl in Italy had been sent a lock of hair in the post. Could the two murders be linked and had the police just made the breakthrough they so desperately needed? In this in-depth and chilling book, acclaimed true crime writer Michael Litchfield investigates the full story of Danilo Restivo, the killer behind the murder of Heather Barnett.

Death Penalty and the Victims Ivan Mr Imonovi? 2016-10-05 This book includes perspectives from a broad range of victims. including family members of the crime victims; convicted persons whose rights are violated by the justice system through wrongful convictions, unequal and discriminatory application of justice, lack of a due process, imposition for crimes that do not meet the most serious crimes threshold or to the categories of perpetrators that should be protected from the death penalty (minors, persons with mental or intellectual disabilities, pregnant women), as well as third parties including family members of the convicted person (especially children and primary caretakers) and persons included in criminal proceedings or executions (such as prosecutors, judges, lawyers and executioners). It is argued in this thought provoking book that the states right to execute violates the right to life and negatively reflects on

human rights of its citizens in general.

The Commanding Heights Daniel Yergin 2008-12-26 The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

Medicine, Sport and the Body Neil Carter 2011-12-06 What role does sports medicine play in today's society? This book analyzes the relationship between sport, medicine and health from the mid-19th century to today. It looks at both history of medicine and the history of sport to give a balanced view of the role of medicine in sport and how this has evolved over the past two centuries.

The Secret Life Of Freddie Mills - National Hero, Boxing Champion, SERIAL KILLER Michael Litchfield 2017-09-07 Seven young women, all murdered in the most disgusting manner imaginable. Unimaginable, in fact: a first of its kind, and never before explicitly revealed. All the victims were prostitutes. All were dumped naked after having been stored by their killer as sex toys. Some of them were mothers. Each was someone's daughter. And for more than fifty years the author has lived with the haunting secret that he was once suspected by Scotland Yard of being a serial killer more depraved and dangerous than Jack the Ripper. In the killing-spree that lasted more than a year, the author had a mole deep inside Scotland

Yard's Murder Squad, similar to 'Deep Throat' from the Watergate scandal, who was drip-feeding him the step-by-step ploys to snare the monster who brought terror to the streets of West London. Hundreds of policewomen, posing as prostitutes, flooded the red-light districts, hoping to be selected by the killer – more hopeful, though, that the back-up would swoop to the rescue in time. At one point, Scotland Yard feared that a prostitute, missing for more than a fortnight, had become the eighth victim and appealed to the public for help. It took the author just eleven hours to track her down and hand her alive and well to the Murder Squad. When the killings stopped, the most senior member of the Murder Squad claimed that the serial killer had committed suicide and an innocent man was named in a deceitful cover-up. The author fingers the real serial killer, a celebrity and national treasure who died in circumstances arguably even more bizarre than the manner in which he murdered his victims.

The Murder of Sonny Liston Shaun Assael 2016-10-20 On January 5th 1971, former heavyweight champion Sonny Liston was found dead at his Las Vegas home. Liston's death, labelled an overdose, has long hung over Las Vegas and the boxing world, leaving unanswered questions about his ties to mob kingpins, drug lords, billionaire hoteliers and powerful promoters. Against the backdrop of the pivotal era in the history of Las Vegas when the mob turned a sleep desert oasis into a gambling paradise, Shaun Assael's The Murder of Sonny Liston is both a riveting murder hunt and a stunning portrait of a city that was home to the Rat Pack, race riots and glittering high-rises along the strip.

Deadly Betrayal Sara Griffith 2016-06-27 In June 1998, the residents of Wollongong, a small town on the outskirts of Sydney, Australia, were left reeling from a brutal murder. In the coming weeks, they would discover that this senseless crime was just the beginning of a twisted saga what would leave three men dead. Australia would watch as a twisted tale of madness, violence, and revenge spewed forth from the normally sleepy town. Soon, the whole country would know the Van Kregel name.

Serial killer Ruben De Luca 2021-09-02 Da Jack lo Squartatore ai mostri di Rostov e di Foligno, una

lunga linea di sangue attraversa l'Europa Prefazione di Roberta Bruzzone L'omicidio seriale esiste fin dalla preistoria, ma i serial killer, definiti come tali, esistono da meno di cinquant'anni e sono entrati nell'immaginario collettivo grazie a personaggi di fantasia come Hannibal Lecter e Norman Bates, il protagonista di Psycho. Questo libro racconta gli iniziali studi del fenomeno, negli Stati Uniti, grazie al lavoro pionieristico dell'FBI e di altri studiosi, per poi concentrare l'attenzione sull'Europa, attraverso l'analisi della Banca Dati dei Serial Killer in Europa, l'unico archivio esistente che contiene storie di vita, analisi del modus operandi e profili psicologici di più di 2200 assassini seriali identificati dal 1801 a oggi. Italia, Francia, Germania, Inghilterra, Russia, ma anche Polonia, Spagna, Svizzera: ogni nazione ha le sue tipologie di serial killer e i numerosi casi descritti permettono di comprendere le caratteristiche dell'omicidio seriale in ogni Paese, grazie anche alla partecipazione di esperti europei che hanno arricchito il testo con i loro contributi originali. L'ultima parte del libro è dedicata all'approfondimento di temi specifici: la donna serial killer, gli Angeli della Morte, il caso del Mostro di Firenze e molti altri ancora. Un libro che rappresenta una guida indispensabile per compiere un viaggio attraverso il cuore nero dell'Europa. Un manuale imperdibile per le polizie europee, per gli studiosi e per gli appassionati che non si perdono un episodio di Dexter, Criminal Minds o di altre serie crime. Quali sono gli elementi per classificare un serial killer? L'identificazione dell'assassino: questione di vita o di morte • c'è correlazione tra l'industrializzazione e gli omicidi seriali? • che età hanno i serial killer? • c'è sempre un quadro familiare difficile? • esistono donne serial killer? • operano in piccole città o grandi metropoli? • il fenomeno degli innocenti che confessano • il mostro di Firenze: un caso ancora poco chiaro Ruben De Luca Psicologo, criminologo, scrittore, è autore di circa 100 pubblicazioni di criminologia, in particolare sull'omicidio seriale, di cui è considerato uno dei massimi esperti a livello europeo. Formatore presso master e corsi di specializzazione in tutta Italia, consulente e opinionista di programmi RAI, dal 2009 si dedica anche allo studio dello stalking e alla realizzazione di

corsi rivolti alle donne per la prevenzione del femminicidio. Tra le sue pubblicazioni più importanti: Anatomia del serial killer 2000 (2001); Omicida e Artista: le due facce del serial killer (2006); Amare uno stalker. Guida pratica per prevenire il femminicidio (2015).

All The Devils Are Here David Seabrook 2014-07-03 Twenty years ago, in a series of mysterious, incandescent writings, David Seabrook told of the places he knew best: the declining resort towns of the Kent coast. The pieces were no advert for the local tourist board. Here, the ghosts of murderers and mad artists crawl the streets. Septuagenarian rent boys recall the good old days and Carry On stars go to

seed. Clandestine fascist networks emerge. And all the time, there is Seabrook himself - desperate perhaps, and in danger. Dark, strange and immediate, this is a classic work of sui generis British literature. There are devils here, and the reader will remember them.

23 Things They Don't Tell You about Capitalism Ha-Joon Chang 2011 One of the world's most respected economists and author of the international bestseller "Bad Samaritans" equips readers with an understanding of how global capitalism works--and doesn't.
