Blood and Guts Roy Porter 2003-06-26 Mankind's battle to stay alive is the greatest of all subjects. This brief, witty and unusual book by Britain's greatest medical historian compresses into a tiny span a lifetime spent thinking about millennia of human ingenuity in the quest to cheat death. Each chapter sums up one of these battlefields (surgery, doctors, disease, hospitals, laboratories and the human body) in a way that is both frightening and elating. Startlingly illustrated, A SHORT HISTORY OF MEDICINE is the ideal present for anyone who is keenly aware of their own mortality and wants to do something about it. It is also a wonderful memorial to one of Penguin's greatest historians.

Eric and his best friend are determined to sniff out the truth - what makes an ordinary boy go 'woof'?

The Distance Between Lost and Found Kathryn Holmes 2015-02-17 Blending elements of Laurie Halse Anderson's Speak and Gary Paulsen's Hatchet, this gripping story from Kathryn Holmes was deemed "a page turner" by author Richard Peck and "an intense story of survival" by ALA Booklist in its starred review. Sophomore Hallie Calhoun has just endured the most excruciating six months of her life. Once the rumors about her and the preacher's son, Luke, made their way around school, her friends abandoned her, and as a result,

Hallie has completely withdrawn. Now on a hiking trip in the Smoky Mountains with the same people who have relentlessly taunted her, Hallie is pushed to her limit. Then Hallie, outgoing newcomer Rachel, and Jonah—Hallie's former friend—get separated from the rest of the group. As days go by without rescue, their struggle for survival turns deadly. Stranded in the wilderness, the three have no choice but to trust one another in order to stay alive...and for Hallie, that means opening up about what really happened that night with Luke. From the catty atmosphere of high school to the unpredictable terrain of the mountains, this novel is a poignant, raw journey about finding yourself after having been lost for so long.

Shakespeare in Kabul Stephen Landrigan 2012-04-01 In 2005, a group of actors in Kabul performed Shakespeare's *Love's Labour's Lost* to the cheers of Afghan audiences and the raves of foreign journalists. For the first time in years, men and women had appeared onstage together. The future held no limits, the actors believed. In this fast-moving, fondly told and frequently very funny account, Qais Akbar Omar and Stephen Landrigan capture the triumphs and foibles of the actors as they extend their Afghan passion for poetry to Shakespeare's. Both authors were part of the production. Qais, a journalist, served as Assistant Director and interpreter for Paris actress, Corinne Jaber, who had come to Afghanistan on holiday and returned to direct the play. Stephen, himself a playwright, assembled a team of Afghan translators to fashion a script in Dari as poetic as Shakespeare's. This chronicle of optimism plays out against the heartbreak of knowing that things in Afghanistan have not turned out the way the

actors expected.

Men and Bears AA.VV. 2020-01-23 The time of Carnival represents a “wild” time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

Logic Programming Marcus J. Lambert 2014 Prolog for logic programming is one of the most intensively studied software languages in the 1980s. During the same period, the data-flow model for parallel computation attracted a lot of attention of researchers in the computer science; hence, it was very natural that several approaches were tried toward combining the two and implementing logic programs in parallel machines with the data-flow architecture. These approaches, however, were rather indirect ones in the sense that they developed programs describing AND/OR-parallelism for deduction using a data-flow language and executed them in a data-flow computer, and yet did not devise a direct model for parallel execution (reasoning) of a logic program. This book discusses fuzzy logic inferencing for Pong; dislog; SEProlog; and provides direct graphical representations of first-order logic for inference.

Killing and Dying Adrian Tomine 2021-05-04 "One of the most gifted graphic novelists of our time." —Wired Killing and Dying is a stunning showcase of the possibilities of the graphic novel medium and a wry exploration of loss, creative ambition, identity, and family dynamics. With this work, Adrian Tomine (Shortcomings, Scenes from an Impending Marriage) reaffirms his place not only as one of the most significant creators of contemporary comics but as one of the great voices of modern American literature. His gift for capturing emotion and intellect resonates here: the weight of love and its absence, the pride and disappointment of family, the anxiety and hopefulness of being alive in the twenty-first century. "Amber Sweet" shows the disastrous impact of mistaken identity in a hyper-connected world; "A Brief History of the Art Form Known as Horticulture" details the invention and destruction of a vital new art form in short comic strips; "Translated, from the Japanese" is a lush, full-color display of storytelling through still images; the title story, "Killing and Dying", centers on parenthood, mortality, and stand-up comedy. In six interconnected, darkly funny stories, Tomine forms a quietly moving portrait of contemporary life. Tomine is a master of the small gesture, equally deft at signaling emotion via a subtle change of expression or writ large across landscapes illustrated in full color. Killing and Dying is a fraught, realist masterpiece.

A Good Old-Fashioned Future Bruce Sterling 2011-06-22 From the subversive to the antic, the uproarious to the disturbing, the stories of Bruce Sterling are restless, energy-filled journeys through a world running on empty--the visionary

work of one of our most imaginative and insightful modern writers. They live as strangers in strange lands. In worlds that have fallen--or should have. They wage battles in wars already lost and become heroes--and sometimes martyrs--in their last-ditch efforts to preserve the dignity and individuality of humanity. A hack Indian filmmaker takes the pulse of a wounded and declining civilization--21st-century Britain. A pair of swashbuckling Silicon Valley entrepreneurs join forces to make a commercial killing--in organic underground slime and computer-generated jellyfish. A man in a Japanese city takes orders from a talking cat while pursuing a drama of danger and adventure that has become the very essence of his life. From "The Littlest Jackal", a darkly hilarious thriller of mercs and gunrunners set in Finland, to a stark vision of a post-atomic netherworld in his haunting tale "Taklamakan", Bruce Sterling once again breaks boundaries, breaks icons, and breaks rules to unleash the most dangerously provocative and intelligent science fiction being written today.
